

LOXONE SHADING ACTUATOR AIR

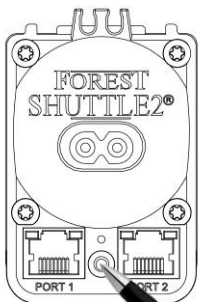

Dry contact inputs of the FOREST SHUTTLE®

Standard input for the Shuttle® motor is pulse contact. When a short contact is made the curtain will open or close fully (default setting). The motor does not stop on release of the contact.

Set the Shuttle® to continuous mode. The motor will run as long as the contact is made.

⇒ For Shuttle® S, L and M receiver: press button 6 times shortly. Light will jump to next LED with every press. To confirm, press and hold once more for 4 seconds until the led blinks 3 times and goes OFF:
